

POT & ELASTOMERIC BEARINGS

Louisiana Department of Transportation and Development (LADOTD)
Project No. 052-02-0024

New Mississippi River Project – John James Audubon Bridge DB Project

Point Coupee Parish, Louisiana
Contractor: Audubon Bridge Constructors, A Joint Venture

For Bridge 3-2 of the West High Level Approach and the Bridge 3 Cable-Stayed Unit, Cosmec, designed and manufactured a combined total of 63 Guided Expansion, Non-Guided Expansion and Fixed Pot Bearings along with Vertical and Transverse Elastomeric Bearing Assemblies. In addition to the design and manufacture of the bearings, Cosmec designed and produced installation devices as requested by the customer.
